DC Notebook Power Adapter

Model #APD10EU

The Targus DC Power adapter provides the perfect power solution for use with your notebook in the air or on the road.

The Targus DC Notebook Power Adapter is the ideal portable power solution for mobile users looking for power in the air or on the road. In a compact and lightweight format this adapter will keep you switched on and productive at all times. Utilising an intelligent tip system, this power adapter is compatible with all major branded notebooks and will provide up to 70W continuous power. Through connection to the airline in-seat power system or from your standard cigarette lighter socket it is the most convenient way to gain the power you need. Combined with our optional Accessory Powering System, users can simultaneously charge or power their mobile phone or PDA thereby eliminating the need to carry extra bulky power adapters or chargers.

KEY FEATURES

- DC notebook power adapter- for use in car or on the plane
- Power or charge your mobile equipment
